

DACIA DUSTER

Multimedia Installation Manual

Connection diagram

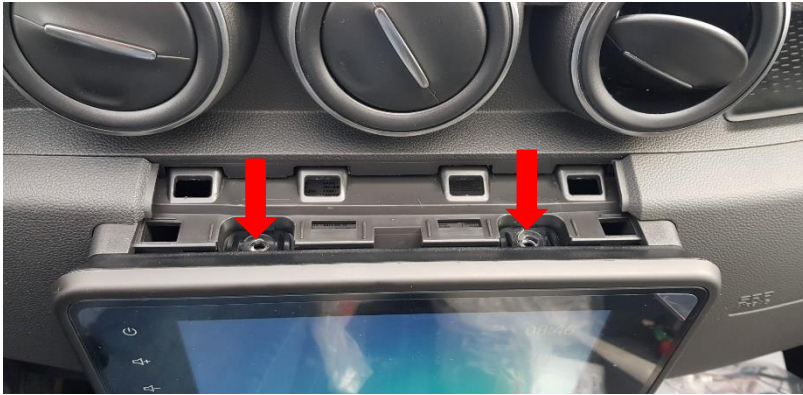

Accessory box contents

Remove the **cover on the upper part** of the original unit and the **key panel** on the lower part, then take the parts out.

Unscrew the 4 screws of the original unit.

Unplug the device and take it out.

With the help of plastic separator disassemble the right pole **upper pillar** and take the part out.

Remove **the right side cover of the glove box** with the help of the plastic separator.

Remove **the airbag switch** from the plastic and reinsert it.

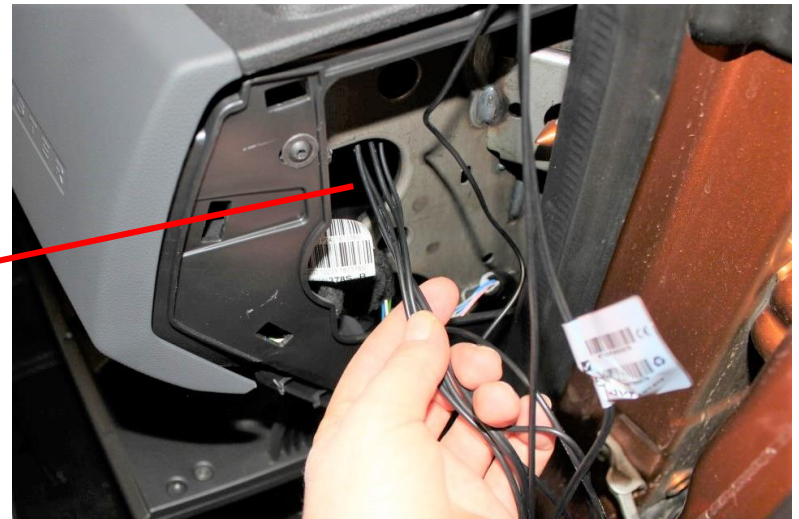

Install the external microphone in the box on the top of the mirror.

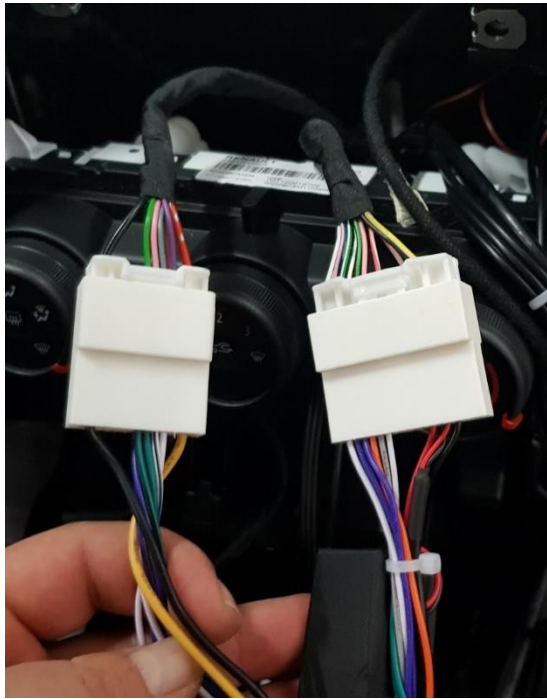

Extend the microphone cable into **the right upper pillar** and fix it there and pull it to the area where the glove box side cover is located.

Move **the microphone cable** from the right gap of the glove box to the area where the unit will be installed.

Combine the **main socket**, **radio socket** and **USB socket** in the box with their vehicle counterparts.

Combine the original **camera connection socket**, **microphone socket** and **USB socket** with their unit counterparts.

After inserting the sockets of the unit, you can install it to the vehicle with its screws.

You can finish the installation after you perform general tests.
